

Batch: A-4 Roll No.: 16010122151
Experiment No. 5
Grade: AA / AB / BB / BC / CC / CD /DD

Title: Hosting website using Google Cloud Platform

Objective:

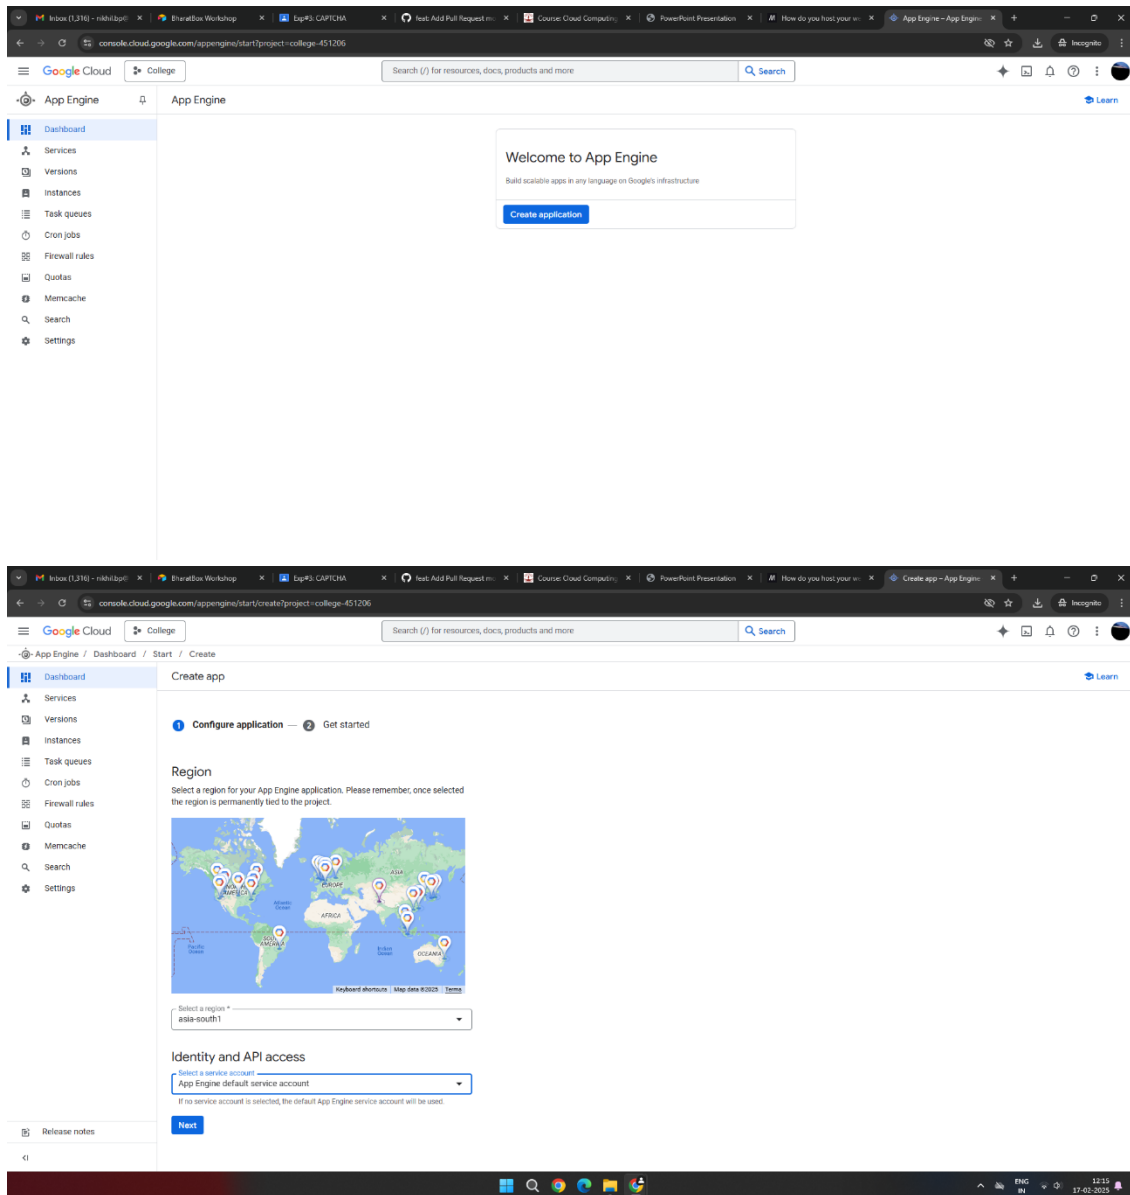

Hosting website using Google Cloud Platform

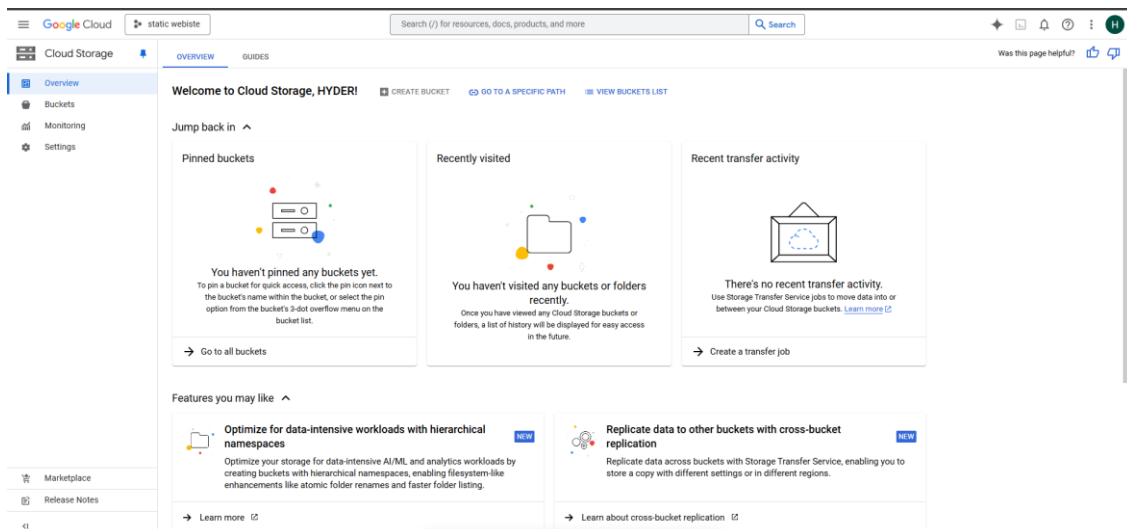

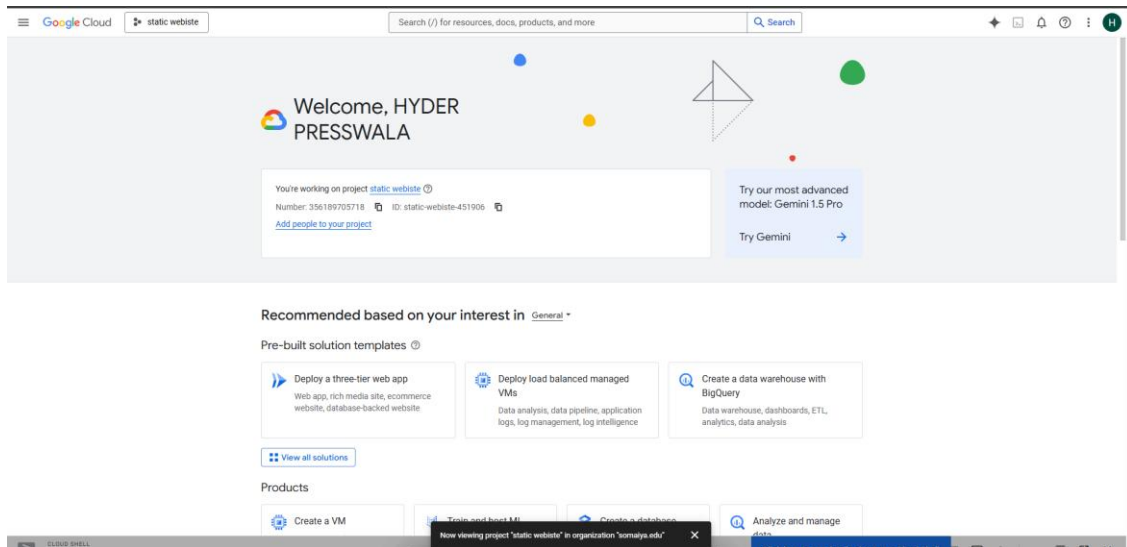

Expected Outcome of Experiment:

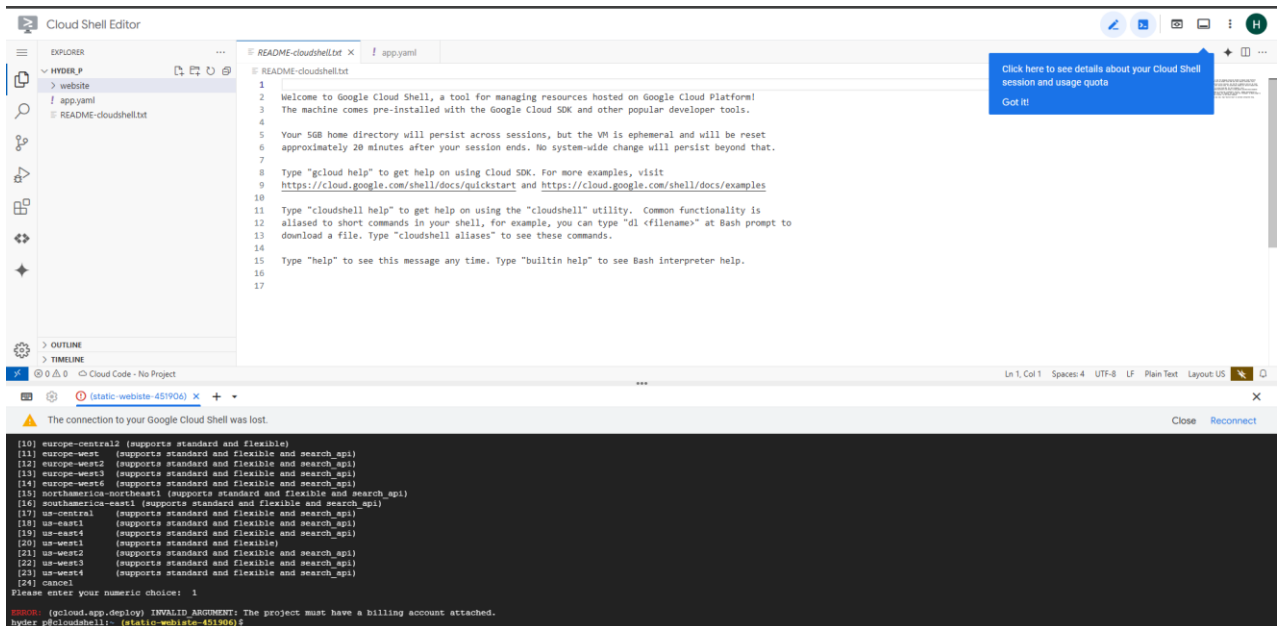

CO	Outcome
CO4	Build cloud services and applications

Books/ Journals/ Websites referred:

1
2 Welcome to Google Cloud Shell, a tool for managing resources hosted on Google Cloud Platform!
3 The machine comes pre-installed with the Google Cloud SDK and other popular developer tools.
4
5 Your 5GB home directory will persist across sessions, but the VM is ephemeral and will be reset
6 approximately 20 minutes after your session ends. No system-wide change will persist beyond that.
7
8 Type "gcloud help" to get help on using Cloud SDK. For more examples, visit
9 https://cloud.google.com/shell/docs/quickstart and https://cloud.google.com/shell/docs/examples
10
11 Type "cloudshell help" to get help on using the "cloudshell" utility. Common functionality is
12 aliased to short commands in your shell, for example, you can type "dl <filename>" at Bash prompt to
13 download a file. Type "cloudshell aliases" to see these commands.
14
15 Type "help" to see this message any time. Type "builtin help" to see Bash interpreter help.

```
Welcome to Cloud Shell! Type "help" to get started.
Your Cloud Platform project in this session is set to starry-summer-451906-c1.
Use 'gcloud config set project [PROJECT ID]' to change to a different project.
hyder_p@cloudshell:~ (starry-summer-451906-c1)$
hyder_p@cloudshell:~ (static-webiste-451906)$ gcloud config set project static-webiste-451906
Updated property [core/project].
hyder_p@cloudshell:~ (static-webiste-451906)$ gc cloud app deploy
Can't open cloud
Can't open app
Can't open deploy
hyder_p@cloudshell:~ (static-webiste-451906)$ gcloud app deploy
You are creating an app for project [static-webiste-451906].
WARNING: Creating an App Engine application for a project is irreversible and the region
cannot be changed. More information about regions is at
<https://cloud.google.com/appengine/docs/locations>.

Please choose the region where you want your App Engine application located:

[1] asia-east1 (supports standard and flexible)
[2] asia-east2 (supports standard and flexible and search api)
[3] asia-northeast1 (supports standard and flexible and search_api)
```

```
Please choose the region where you want your App Engine application located:

[1] asia-east1      (supports standard and flexible)
[2] asia-east2      (supports standard and flexible and search_api)
[3] asia-northeast1 (supports standard and flexible and search_api)
[4] asia-northeast2 (supports standard and flexible and search_api)

```

Conclusion:-

We got to know how to deploy a application on Google Cloud and deploy it!
